

SAFEbite AI: KNOW BEFORE YOU ORDER

Problem Statement

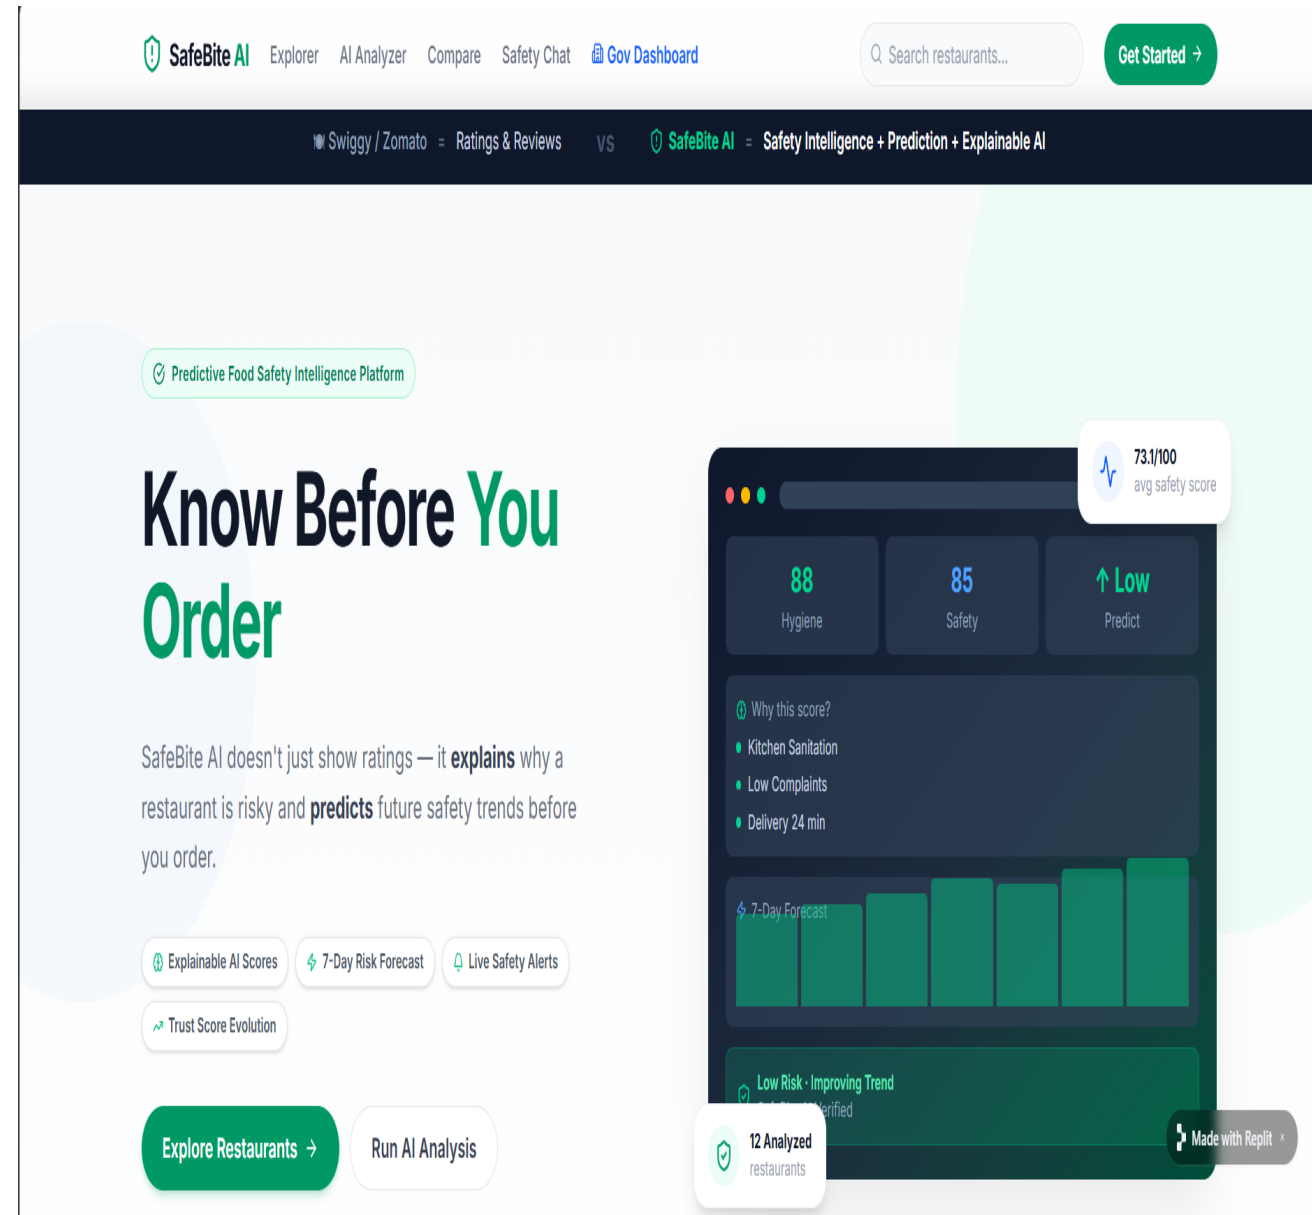

- Food delivery platforms show ratings and reviews, but they do not reveal actual food safety risks. Customers often order food without knowing the hygiene and safety conditions of a restaurant.

Solution

- SafeBite AI is an intelligent Food Safety Agent that analyzes hygiene scores, complaints, delivery performance, and safety trends to predict risk before an order is placed.

How It Works

- Restaurant Selection → AI Analysis → Risk Prediction → Safety Recommendation

INNOVATION & IMPACT

Key Features

- *Explainable AI Safety Scores*
- *Risk Prediction & Safety Alerts*
- *Complaint-Based Monitoring*
- *PDF Safety Reports*

Impact

- *Helps users make safer food choices*
- *Improves transparency in food delivery*
- *Encourages better food safety standards*

One-Line Pitch

- *"Food delivery apps show ratings. SafeBite AI shows whether the food is actually safe before you order."*
